

STATIONS UTILITAIRES FRANCAISES EN HF

Écoulées en 2001

INTRODUCTION

Ce fascicule est une compilation des stations françaises en HF (<30Mhz) dites « utilitaires », écoutées par différents radio écouteurs à travers le monde.

Les informations contenues dans ce document, proviennent des différentes *Newsletter Electronic* du WORLDWIDE UTE NEWS Club (WUN), plus particulièrement de la section *WUN UTILITIES LOGGINGS COLUMN*, et couvrent l'année 2001.

Ce document est constitué dans tableau comportant trois colonnes, comme dans l'exemple ci-dessous :

26241,7	RFVI: FN Le Port 0630 Arq-E3 100/400 Msg\FF fm RFVIC/Comar La Reunion to RFVIFLR/Floreal info Zen/Cosru Port des Galets & RFFINDI/Alindien with MeteoFrance Metoc Data for Reunion,Amsterdam,Crozet & Kerguelen - AVIS DE TEMPETE!!!! Force 9 vitesse de Beaufort!!!	06/10/01
---------	--	----------

Fréquence (en KHz)	RFVI : indicatif de la station écoutée FN Le Port : Nom de la station 0630 : Heure de l'écoute (en TU)	ARQ-E3 100/400 : Mode Msg\FF [...] : Contenu de la transmission	Date de l'écoute (jj/mm/aa)
-------------------------------	---	--	--

Le tableau est trié par Ordre Croissant des Fréquences et par Ordre Croissant de la Date (par rapport à la même fréquence).

Les commentaires de la 2^{ème} colonne sont en langue anglaise, mais très facilement compréhensible même pour un non anglophile.

Remarque : Vous trouverez parfois la même station reportée plusieurs fois sur la même fréquence (mais à des dates différentes). Ce ne sont pas des doublons oubliés d'être effacés ! Je les ai volontairement laissé car cela permet de ce faire une idée quant à l'activité de ces dites stations.
